INTERTEK

INTRODUCTION

The Perforated Air Grille combines a inner core of perforated aluminium or stanless steel sheet surround with a frame of 30 mm wide .

This grille has a free area of approximately (16% : 50%) which makes it extremely effective in all air function..

CONSTRUCTION

FRAME

Standard outer frames from best quality extruded aluminium alloy 6063 profile .

PERFORATED FACE BOARD

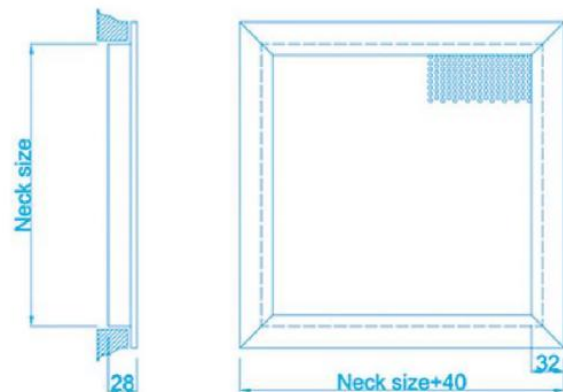

Perforated faces from Galvanised steel ,or stanless steel (316)pr aluminum sheet upon request .

FRAME CONSISTS OF EXTRUDED ALUMINIUM PROFILES CONECTED TOGETHER BY MITRED METAL STRIPS (CONNECTORS) TO GET RIGID FRAME .
PERFORATED FACES FIXED USING WELDING.

FINISH

Standard mill finish or white Powder coated RAL9010 Alternative special colors are also available upon request.

Perforated Flat Diffuser
